

# SANO<sup>3</sup>

OZONE THERAPY KIT FOR  
MAJOR AUTOHEMO INFUSION

BLOOD TREATMENT INNOVATORS

# OZONE THERAPY KIT FOR MAJOR AUTOHEMO INFUSION

---

## **CLOSED CIRCUIT**

SANO3 is a closed circuit system that allows the performance of all the procedures of the Major Autohemo Infusion Therapy in conditions of extremely high safety, avoiding risks of environmental contamination.

## **NO NEEDLES**

SANO3 system does not require other needles except to the sample one. The procedure of  $O_2O_3$  insertion to the bag is done with a needleless syringe without risk of infection for accidental needlesticks.

## **PHTHALATES FREE MATERIAL**

All the components in SANO3 system are certified by the major International Pharmacopoeias and follow the highest qualitative requirements. The entire system is phthalates free.

## **AUTOMATIC CONNECTIONS**

SANO3 system is provided with needlefree advanced connections with automatic open-close ports, assuring hermetic closing before and after use.

## **ABSENCE OF BLOOD CLOTS AND GAS EMBOLISM**

SANO3 allows the performance of the necessary procedures of the Major Autohemo Infusion Therapy treatment without risks of blood clots and gas embolism.

## THE KIT

A 400 mL bag in PVC DEHP-free material  
Containing 35 mL of anticoagulant ACD-A solution  
Complete of automatic needle free connections  
Sterile

Blood infusion set with 175 micron filter  
Complete of Y injection port  
and Luer Lock connection  
Sterile
